MOTIVATION

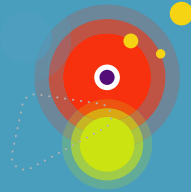

We Are VentureUP!

A bridge between higher education and the economy. VentureUP is the official entrepreneurship center and incubator of the University of Prishtina. We provide entrepreneurship support, mentoring and training for students who want to transform their ideas into real businesses, and self-sustaining organizations. We work with students who are in the early stages of their business ideas to those who have advanced in the process of building their own enterprises. Located in the center of the main campus, VentureUP serves as the epicenter of innovation and entrepreneurship at the University of Prishtina "Hasan Prishtina".

BUSINESS CONSULTANTS

2019 being the second year of VentureUP has been full of activities numerous as training, motivational lectures, discussions and incubator for start-up businesses.

INCUBATION

The first business incubator by VentureUP has proven to be a very successful project with six new businesses/StartUps that have been developed in our spaces. These StartUps have received 17,500€ in cash, professional training, workspace, and other specific needs.

Thanks to VentureUP, Donors and Sponsors, these new companies operate today in Kosovo and beyond.

ORDERBIT

Orderbit is a StartUp company operating on the field of e-commerce/B2B. Their developed app offers pharmacies the ability to order products without have to make in person contact with pharmaceutical warehouses and other suppliers. This platform also facilitates their operations and reduces communication time between pharmacies and pharmaceutical warehouses.

AUTOVEGLA

Autovegla is an innovative company that aims to contribute with technological projects in the automotive sector. As the first automotive market project, it has launched the E-commerce platform, www.autovegla.com, for buying and selling auto parts and tools. The platform will serve as a web site, while also available as an app on iOS and Android.

autovegla.com

AXYZ

It is a 3D modeling and printing company that is 3D modeling and / or printing your object to imagination. AXYZ can make objects from different types of materials with high quality and fast service. During difficult times of COVID-19, AXYZ has voluntarily start producing cover masks for medical personnel of the Kosovo Central Health Clinic.

MAIA

MAIA is a technology company based in Kosovo. Their first project is an innovative product that solves the problem of waste separation, compression and waste management. Waste separation is automatic, done with the help of artificial intelligence and processing of the image and the waste is divided into three parts - plastics, aluminum and other materials.

HOSO

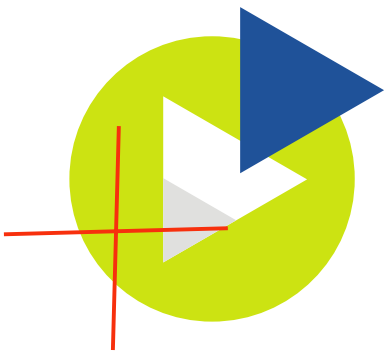

HOSO (Home Online Service Ordering) is a solution for ordering of food products online and deliver them to personal buyers. The application consists of two parts, one that offers the possibility to order food products online and being delivered quickly. Hoso enables making money by working as a personal shopper.

MENDJA.AL

Mind.al is a digital platform that offers online courses for students in the field of software development by experts' industry and with an updated and designed curriculum. The mission of the Mind is to help Kosovar youth and professionals build and advance their careers in the industry of software development.
